*Mineral Wells Unequalled On
The Western Continent.*

**ENCHANTING VIEWS OF MOUNTAIN
PEAKS AND OCEAN WAVES.**

**Magnificent Drives, Bathing Beaches,
Unrivalled Attractions.**

No embryo city in Southern California will ever achieve the distinction that the future evidently has in store for Carlsbad. To the pleasure-seeker, the invalid, the worn-out pursuer of wealth, to the business man of small means, to the wanderer in quest of a pleasant and a healthful home, it offers overpowering inducements. It is one of the favored spots of Nature, such as Byron delighted in when his gifted muse dwelt upon the unrivalled attractions of the vast deep.

"There is a pleasure in the pathless woods,
There is a rapture on the lonely shore,
There is a society where none intrudes,
By the deep sea, and in its roar."

It is difficult to deal with the subject in generalities. Each special point deserves to be dwelt upon, not at length, but sufficiently in detail, that it may be presented to the full comprehension of the reader. Let us first refer to the climate, which has brought Southern California into such prominence, not only before the people of the Mississippi Valley and the Atlantic States, but to the entire civilized world.

CLIMATE

North of Point Conception, the coast line of California is cold, foggy and exceedingly disagreeable as a place of residence. In many localities it may be pronounced unhealthy in the extreme to persons of a delicate physique. To the consumptive the chill breath of the ocean there wafts the signal of speedy death. South of Point Conception, the atmosphere is warm, soft, genial, and health-inspiring. The perfection of climate is reached along the ocean border of San Diego County. At the center of the southern belt of this veritable climatic paradise, is located the future celebrated health resort of Carlsbad. Cold winds, snows, frosts, all rigors of spring, autumn and winter, are utterly unknown. The intense heats of the Eastern States and Interior California, are unheard of. Eighty degrees in the shade is the highest achievement of our glowing sun; for the gentle breezes of the ocean subdue his tropic powers, and produce a delicious temperature. Here is a scene for perennial roses, for gardens of perpetual bloom, for fruits and flowers throughout the lengthening year. All that may be said of Nice, Mentone, Naples, of the most famed localities of Italy, France and Spain, may be said of beautiful Carlsbad, and with greater emphasis.

"It is a pleasant thing to see
What Heaven hath done for this delicious land."

SCENERY.

There is not in the world a more sublime object than a boundless ocean, spreading its purple waters beneath an unclouded sun. Such a vision of beauty, seen but once in a life-time, becomes an unforgettable memory to which the fancy ever loves to fondly revert. Happy are they who gaze upon the dominions of Neptune daily, and nowhere are the waters of his wide-spreading seas more tranquil, lovely, more deeply blue, than upon the broad and calm Pacific. Rude storms are unknown along these delightful shores. The winds that visit us, are from the orange groves and summer shores of Hawaii, from the tropical regions of "far Cathay". The south-west front of Carlsbad is composed of a broad terrace that overlooks and slopes down to the unrolled ocean. Far as they eye can reach, expand the glittering waters. By moonlight, the spectacle presented is one worthy of the poet's pen—of the limner's pencil. Almost daily, along the coast, can be plainly seen Point Loma, forty miles to the southward; to the seaward sixty miles are the Isles of Coronado and the Santa Catalina Islands; turning toward Interior California, the eye sweeps in the magnificent ranges of San Jacinto and San Bernardino, their soaring peaks white with snow.

CALIFORNIA'S FOUNTAIN OF YOUTH.

When Ponce de Leon set forth on his romantic journey in quest of the fabled Fountain of Youth, he voyaged in vain along the Atlantic shores, and perished at last in the malarious morasses of Florida. Had the grim old warrior had happier fortune, his feverish dream might have been realized on the shores of Southern California. Down deep in the earth at Carlsbad, five hundred and fifteen feet beneath soil and granite, lay hidden a fountain of magic powers, that possesses virtues almost potent enough to restore

the lost youth he lamented. The mineral waters of Carlsbad are destined to lasting fame. Their curative properties are beyond question. As inevitably as other liquids induced in to excess, destroy the human frame, so will the waters of Carlsbad built up, and restore its impaired energies. The name given to this new health resort of permanent renown, is derived from the fact that a chemical analysis demonstrates that its water are almost identical with those of Carlsbad in Germany, a place which has been visited annually for six hundred years, by the nobles, kings, and emperors of all Europe. What more needs to be said of California's newly discovered Fountain of Youth? There is not, on the western hemisphere, a mineral spring that will approach it in medical value. For dyspepsia, general debility, chronic inflammation of the stomach, loss of appetite, chronic vomiting, flatulence, heart burn, ulceration of the stomach, constipation, chronic diarrhoea, congestion, enlargement of the liver, and for the destructive kidney diseases that are destroying American manhood, it offers an unfailing specific. All wastage of the human system it is powerful to repair. Some of the most prominent scientists of the United States have expressed this opinion in the most positive, unqualified manner. Hundreds of invalids, from actual experience, can attest the same.

SITUATION.

To descend to more prosaic details, which are equally demanded by the reader, Carlsbad lies on the line of the California Southern Railroad, 39 miles nearly north from San Diego. The terrace or plateau skirting the ocean, and staying its incoming tides, slopes gently inland, and losses itself in a happy valley already dotted with beautiful homes. It would be impossible to select a more attractive location for a city of pleasure.

THE WELLS.

The most precious minerals are found at the greatest depths in the bowels of the earth. It seems to be the dictum of Nature that man shall toil hard for whatever he most highly values. Such has been the case with the Carlsbad waters. They lie 515 feet deep, and were discovered by accident, as the fabulous ores of Peru were discovered. In hoping for a flowing artesian well, water was found, but it would not rise to its own accord. It was accordingly pumped to the surface. The strange and peculiar but not unpleasant taste that characterized it, challenged investigation. On being analyzed in a thorough and scientific manner, its life-restoring qualities were made manifest, and were published to the world. Enterprising men with abundant capital seized upon the golden opportunity. It was promptly decided to bore other wells. The first experiment resulted in another remarkable discovery. This well produced water that is an absolute specific for all manner of the most harassing skin diseases. It is a mineral water for bathing purposes, and has already proven its virtues by marvelous cures within a brief period. To myriads of sufferers it will prove an inestimable boon. A third well brought to the surface clear, cold, sparkling water, suitable for ordinary drinking and household purposes. These wells are located on the ocean terrace previously referred to. A fourth well sunk on the opposite side of the valley, produced an abundant supply of pure water.

SURF BATHING.

The ocean terrace slopes gradually down to one of the most beautiful sea beaches on the continent. For a distance of fifty miles the pleasure seeker may drive in perfect security on a road bed of hard, firm sand, with the land on one side and the inrolling billows on the other. Everywhere along the front of Carlsbad surf bathing may be indulged in without the usual perils accompanying the enjoyment. There is no undertow, no sharks or sting-rays, no ocean vermin of any description. Ladies and children may bathe unattended without danger. The ocean water, warmed by the blazing sun, is tepid, cleansing and exhilarating. The physical benefit of surf bathing needs no more than a passing allusion. With an incomparable climate, ocean bathing, a veritable Fountain of Youth, and peerless marine and mountain views, Carlsbad may well aspire to be the chosen health and pleasure resort, not only of the Pacific Coast, but of the entire western continent. An other fact deserves reference. The soil of the valley, and of the uplands, is so rich that irrigation will never be required. Every tree known to the semi-tropic belt, every shrub and flower, will thrive here in perfume and beauty. To all who sigh for health and repose, who loves the sublimities of nature, or who are viewing the land in quest of investments that will ere long repay a thousand fold, the rapidly growing pleasure resort of Carlsbad extends a generous welcome. Here is the chosen spot, the future abode of health, wealth and innocent pleasure.

Carlsbad, California.

A City of Pleasure!

The Future Health Resort

of the
WESTERN CONTINENT.

SECURE A HOME

in CARLSBAD, while yet it may be had at a very moderate outlay.

Values are daily enhancing.

Now is the golden opportunity.

Fortune's favors are never extended twice.

Its mineral waters will make it the permanent resort of the wealthy. It will be the Mecca of the pleasure seeker, the tourist, and the invalid. The fame of this future great watering place will become world wide. A dollar invested now will increase ten fold within a very few years. Ocean bathing, beach drives, unequalled elsewhere, enchanting marine views, magnificent mountain scenery. Art and Nature combine to produce an earthly Eden. Beautiful homes are now being built on these already purchased. A great boom is in progress. Take a hand in it.

"There is a tide in the affairs of man,
Which, taken at the flood, leads on to fortune."

Let the victims of disease hasten to Nature's marvelous font of health and be restored.
To drink of these healing waters, is to renew health and life.
Here is a rich field for speculation—none in California exceeds it.
Overlooking the ocean, the rising pleasure city of Carlsbad lies on the California Southern railway, 39 miles from Los Angeles and 40 miles from San Diego.
Its famous mineral water can be sent by express to any destination.
Lots for sale from \$175 to \$500; one-third cash, balance in 4 and 12 months, or 5 per cent discount for cash.

CARLSBAD SEA LION.

PUBLISHED AT
CARLSBAD, SAN DIEGO COUNTY, CAL.

FOREIGN GOSSIP.

—It takes 14,800,000 gallons of oil a year to keep the railways of Great Britain going, and the cost is nearly \$2,000,000.

—The telegraph line in Northern China has been finished. The project, together with the necessary complement of men, commenced building the line on the 15th July, and by the 5th of August they had advanced as far as P-tu-ch'eng. From the latter place the line was carried across the Sung-hua river, and thence to the Amoor river, where the terminus was reached at Tsitsikar.

—The great killer of snakes in South Africa is the secretary bird, a gray bird with long legs, whose name is derived from its projecting feathers on the side of the head, which look like quill pens. Snakes constitute the principal food of the birds, and thousands are killed by them. The snake is first disabled by a severe blow with the foot or beak, and then carried up to a great height in the air, whence it is allowed to fall and be crushed on the earth below. The secretary bird is protected in Cape Colony on account of its services in thus destroying venomous serpents. —N. Y. Ledger.

—The hope of zoological London is at this moment a young gorilla brought from the Gaboon, and in stature and bulk about the size of a boy of thirteen. His room is warmed constantly to a temperature of seventy-two degrees, and he has clean straw for his couch, and the most tempting delicacies in sweetened pudding and bananas, but he has no appetite and is evidently in doleful grief at having been kidnapped from his native forests. A most amiable and accomplished female chimpanzee lives next door, but even the dulcet tones of her humorous confabs with the keeper have not a single charm for the homesick gorilla.

—A foreign paper gives the official report of the head officer having charge of woods and rivers in Belgium, from which it appears that the total length of highways in that country amounts to 4,227 miles, of which there are already planted more than one-half, or 2,117 miles, with 264 miles yet to be planted. The present value of the trees is now four times as much as their original cost, or have a money value of more than \$2,000,000. Among the trees thus planted elms are in the largest numbers, then oaks, next poplars, and in diminishing numbers are hick, beech, maples, Norway spruce and larch. Fruit trees are in much smaller numbers. —Chicago Times.

—At the present time there are nearly three thousand soldiers of the Russian army under treatment for ophthalmia in the hospital at Odessa. Diseases of the eye are very common in the Russian army, and are caused by the excessively hot, rainless and dusty summers and the dazzling glare of the steppes in winter. One would suppose that when ophthalmia is so prevalent in the Russian army, it would be especially well posted about it, but this is not the case. The greater number of these ophthalmic patients in the army are never treated by a qualified ophthalmologist, and little is ever done to relieve or cure them. —N. Y. Tribune.

America's Highest Mountain.

"The highest mountain in America" must now be changed from Mount St. Elias to Mount Wrangell, a little to the north. Several of these mountains have been newly measured. Mount H. once "roughly" estimated at 17,000 feet, then "closely" at 16,000, was brought down by triangulation to 13,000; an aneroid barometer made it 12,000 and a mercurial barometer 11,255. Mount St. Elias, estimated by D. Agelet to be 12,675 feet, is triangulated by Mr. Baker to 19,500. It now appears that Mount Wrangell, lying to the north, rises 18,400 feet above Cooper river, which is in turn 2,000 feet above the sea at that point. If this holds true, Mount Wrangell is at least 1,000 feet higher than any other peak in North America. It lies within the United States boundary. —Nature.

—Chief Justice Waite at the age of seventy-two is the most energetic member of the United States Supreme Court. He is the only one of the justices who has not availed himself of the act of Congress giving him a private secretary at \$1,800 a year. "I don't want one," says the Chief Justice, "he'd only be in the way." Waite is a hard-headed practical man who reads nothing but law books, works twelve hours a day, and has little or no imaginative power.

Something Pleasant.

"Can't you say something pleasant to me?" said a husband to his wife as he was about to start for his office. They had had a little quarrel, and he was willing to "make up."

"Ah, John," responded the penitent lady, throwing her arms around his neck, "forgive my foolishness. We were both in the wrong. And don't forget the baby's shoes, dear, and the ton of coal, and we are out of potatoes; and John, love, you must leave me some money for the gas man." —N. Y. Sun.

—It is said that Julian Hawthorne is to give up writing to go into business.

BILL NYE AS A PLAYWRIGHT.

He Describes a New Opera of Which He is the Author.

—The opera itself is called "The Singed Cat," because it is really so much better than it seems to be. The music was composed partly by myself and partly by a count who plays on the ferryboats in summer and has his winters to himself. He does not wish to have his name used, because, as he says, he is afraid that "foreign powers will get on to it and make him come back to attend to the count business again." He says it is very disagreeable to be a count and live on a long, slim pedigree and what the neighbors bring in from time to time.

The orchestra opens the performance with a selection from the "Flying Dutchman." Difficult as it may appear, the orchestra makes a good selection from this gentleman, and it is played well after everything is ready. It takes some little time for an orchestra to get ready, however. The man who gives off the first joint of the clarinet breathes a few liquid notes, the first violin sounds "A" and the gentleman with the bassoon looks up into its dark recesses to see if any cayenne or kittens have been deposited there since he played last. The superintendent of the large violin stands it up on end and feels its staccato. He then chalks his bow

and the leader whispers in a low voice to the man who salivates the cornet. The snare drum soloist gets his assortment of drums into a semi-circle, hangs his triangle where he can get at it, runs his eye over the xylophone, sleigh bells, bird call, picket fence, bones, castanets, cymbals, Swiss bells and fortissimo. The leader writes his autograph in the atmosphere with his stick and the band goes into committee of the whole with a wild moor. A difficult piece then follows. Some of the audience are heard to state that they wish it had been so difficult that the orchestra could not have played it.

The curtain now rises, and a primary school of over 800 pupils is seen passing in review across the stage, singing a song of fortissimo verses, meaning going through a system of calisthenics. In making one night stands with "The Singed Cat," most any primary school will do with a few rehearsals for this chorus. Get these children secured in advance and all their parents will come to see how the children look on the stage. I thought of this myself.

A beautiful soprano now comes on, accompanied by her voice, and wonders where Felix is. She decides to sing a small song while waiting for him. The song is an arpeggio with diatonic scales on it. It begins low and flutters, like the cry of a wounded clay pigeon, and gradually soars upward, like the price of coal, and ends with some artistic gargling which suggests a warble in the upper register.

As she gets more confidence in herself she becomes more irritated because Felix did not get there at the same time he said he would. The prima donna of the "Singed Cat" has a pleasant voice, full of timbre and fine allegro movement, bordering on the andante. Mr. Riley, who has heard her, says that when she pulls out the last joint on her cressendo and opens her upper register, her mouth looks not unlike a stab in the dark. She sings with the whole arm movement, and her action is good as she goes by the judges' stand. She has a selection in the second act called "Back to Our Mountains," in which she starts off with a ritard in which she emits a chest note which tests the acoustics of the hall, and then she is tickled to get back to her mountains, such as they are, and is pleased with the altitude. She has assisted in "The Damnation of Faust," but otherwise her conduct has been good. She is a widow, her husband being deceased. He was listening to the song of a buzz saw near Stillwater, Minn., in 1875, and got an idea that the saw had something confidential to communicate and desired to take him apart for that purpose. Anyway, he was in that condition when they found him. For that reason her music is frequently tearful and often softlegio in spots. Her repertoire is very large and has a lid on it. The only criticism that I feel warranted in making, and I hate to do that, is that she has slightly ruptured her voice by trying several years ago to sing a duet with herself and thus draw two salaries.

When the applause has died away Felix comes in with a baritone voice and diminished triad. He thinks of the first verse while the piccolo makes a few desultory remarks, and then he explains how he could not get there when he agreed to be because the jury disagreed, or something of that kind. He swallows an imaginary clam with the shell on it, and begins in a low, passe roundelay which develops into a duodecimo run. He is accompanied by a running mate, consisting of a flute with a large red mustache over the main entrance.

"The Singed Cat" will be produced at the Polo grounds early in January. Let there be a full house. —Bill Nye in New York World.

THE SCHOOL.

—The Ladies' Association of the Established Church of Scotland raised \$31,785 in 1886, and in its mission in Africa, India and China they support 12 European missionaries and 98 Eurasian and native workers. In their 33 schools are 2,463 scholars, and 400 Zenanas welcome the visits and teaching of their Christian agents. —Public Opinion.

—The following statistics have been published of London: Aggregate midsummer population, 5,416,006; total church sittings, 1,903,509—a proportion of 35 per cent. to the population. Of this 35 per cent. the Establishment supplies 4.95 per cent. and the free churches 50.5 per cent. It is estimated that not more than one-half the accommodation is actually used for public worship.

—The Congregationalists at Naugatuck, Conn., are erecting a parish house with twenty-four rooms, besides hall, cloak-rooms and closets. The first floor has an assembly-room, reception-room, Sunday-school, library and seven class-rooms, and on the second floor eight class-rooms, reading-rooms, kitchen, dining-room, coat and cloak rooms. On the third floor will be the pastor's study and a room for a gymnasium. —Public Opinion.

LOW-TONED FICTION.

Women the Most Prolific Producers of Questionable Literature.

Many of the novels now published may be classed under the above heading, more especially those written by inferior novelists. Women are great offenders in this respect, some honorable exceptions shining out among other like stars in a cloudy sky. Every day sees some novel issue from the press, and chronicles the plunge of yet another aspirant for literary fame into the crowded arena to swell the lengthy list of authors. It is a sign of the times that what are termed "racy" novels are the most run after by the fiction-reading public, and consequently those most readily accepted by certain publishers. In this money-getting, money-grubbing age some publishers and authors seem to have met on common grounds in pandering to a vitiated popular taste, and producing books which will not bear the test of being read aloud in the home circle. Among the worst offenders in such novel-writing are women, who choose risqué subjects to write on, and dwell with a minuteness of detail on topics which the purer-minded of their sisters would hesitate to speak of. There are exceptions, as we have said—women who do not degrade their talents, but write with a purity of purpose books which it is a pleasure to read and re-read. Can any one, looking at the question of nineteenth-century light literature from an unprejudiced point of view, say that the style of writing now is an improvement on that which obtained a century ago? The novels of those days were decidedly coarse, their plainness of speech corresponding with the habits and customs of the period; but books were then written with the laudable intention of showing up the vices of which they treated, and, if possible, checking such vices by pungent and scathing satire, thus being in advance of fashionable modern society novels, which, though more refined in speech, are more destructive to morality, in that the authors gloss over sin, picturing it in alluring colors, wrapping it up in sensuous word painting, and, while professing to disapprove, yet setting it before youthful imaginations in any thing but its hideous reality; or else write in such a matter-of-fact, everyday-occurrence sort of light of vice as to rob it of its actual criminality. —Chambers' Journal.

THE SOPRANO.

—The cry of a wounded clay pigeon, and gradually soars upward, like the price of coal, and ends with some artistic gargling which suggests a warble in the upper register.

As she gets more confidence in herself she becomes more irritated because Felix did not get there at the same time he said he would. The prima donna of the "Singed Cat" has a pleasant voice, full of timbre and fine allegro movement, bordering on the andante.

Mr. Riley, who has heard her, says that when she pulls out the last joint on her cressendo and opens her upper register, her mouth looks not unlike a stab in the dark. She sings with the whole arm movement, and her action is good as she goes by the judges' stand. She has a selection in the second act called "Back to Our Mountains," in which she starts off with a ritard in which she emits a chest note which tests the acoustics of the hall, and then she is tickled to get back to her mountains, such as they are, and is pleased with the altitude. She has assisted in "The Damnation of Faust," but otherwise her conduct has been good. She is a widow, her husband being deceased. He was listening to the song of a buzz saw near Stillwater, Minn., in 1875, and got an idea that the saw had something confidential to communicate and desired to take him apart for that purpose. Anyway, he was in that condition when they found him. For that reason her music is frequently tearful and often softlegio in spots. Her repertoire is very large and has a lid on it. The only criticism that I feel warranted in making, and I hate to do that, is that she has slightly ruptured her voice by trying several years ago to sing a duet with herself and thus draw two salaries.

He is accompanied by a running mate, consisting of a flute with a large red mustache over the main entrance.

"The Singed Cat" will be produced at the Polo grounds early in January. Let there be a full house. —Bill Nye in New York World.

THE MAN DICKENS.

How He Impressed Acquaintances and Intimate Friends.

Dickens was only thirty-three when I first saw him, being just two years my junior. I have said what he appeared to me then. As I knew him afterward and to the end of his days, he was a strikingly manly man, not only in appearance, but in bearing.

The inexpressible brilliancy of his eyes was very striking. And I do not think that I have ever seen it noticed that those wonderful eyes which saw so much and so keenly were appreciably, though to a very slight degree, near-sighted eyes. Very few persons, even among those who knew him well, were aware of this, for Dickens never used a glass. But he continually exercised his vision by looking at distant objects, and making them out as well as he could without any artificial assistance. It was an instance of that force of will in him which compelled a naturally somewhat delicate frame to comport itself like that of an athlete. Mr. Forster somewhere says of him: "Dickens' habits were robust, but his health was not." This is entirely true as far as my observation extends. Of the general charm of his manner, I despair of giving any idea to those who have not seen or known him. This was a charm by no means dependent on his genius. He might have been the greatest writer he was and yet not have warmed the social atmosphere wherever he appeared with that summer glow which seemed to attend him. His laugh was brimful of enjoyment. There was a peculiar humorously protest in it when recounting or hearing any thing specially absurd, as who should say: "Pon my soul, this is too ridiculous! This passes all bounds!" and bursting out afresh as though the sense of the ridiculous overwhelmed him like a tide, which carried all hearers away with it, and which I well remember. His enthusiasm was boundless. It entered into every thing he said or did. It belonged doubtless to that amazing fertility and wealth of ideas and feeling that distinguished his genius. —Adolphus Trollope.

—There are now about ten thousand metal and elastic contrivances in the market for the sole purpose of holding together and at a respectful distance different portions of a gentleman's wearing apparel. —Boston Budget.

—The expense of living has greatly increased in Washington, and the high rents are troubling many Congressmen who have only their salaries to depend upon. Houses in the fashionable section rent for from six hundred to thirteen thousand dollars a year, and the six hundred dollar houses are, as a rule, little ones of six or eight rooms. Provisions are plenty, but prices are high.

—The receipts of the American Board for the first month of the present year amounted to \$30,688.57, being double that of the same month last year.

—If a man should lose an article of wearing apparel every time he told a lie, there are men who would never pray for winter. —Pomeroy's Advance Thought.

—The American Board recently held a farewell meeting in Boston for fifty-eight missionaries—one to Spain, nine to India, thirteen to Turkey, sixteen to Japan, nineteen to China. —Public Opinion.

—Prof. Thomas Carnely and a Mr. Holdam, of a college at Dundee, have been investigating sewer air, and report that it averages as pure, so far as disease germs are concerned, as the air in ordinary houses.

—The Presbyterians of New York City are talking about raising a fund of \$1,000,000 for ministerial relief, and it is desired to have the amount pledged before the centennial of Presbyterianism in 1888.

—In studying the Word of God digest it under these two heads: either as removing some obstructions that keep God and thee asunder, or as supplying some uniting power to bring God and thee together. —Cecil.

—A writer in a recent number of the *Chautauquan*, who, as editor of a New York paper, has had long experience in the examination of manuscripts, states that Princeton graduates show the best training in English, and write the least like amateurs, and Harvard students rank next. His observations embrace at least twenty institutions.

—The Ladies' Association of the Established Church of Scotland raised \$31,785 in 1886, and in its mission in Africa, India and China they support 12 European missionaries and 98 Eurasian and native workers. In their 33 schools are 2,463 scholars, and 400 Zenanas welcome the visits and teaching of their Christian agents. —Public Opinion.

—The following statistics have been published of London: Aggregate midsummer population, 5,416,006; total church sittings, 1,903,509—a proportion of 35 per cent. to the population. Of this 35 per cent. the Establishment supplies 4.95 per cent. and the free churches 50.5 per cent. It is estimated that not more than one-half the accommodation is actually used for public worship.

—The Congregationalists at Naugatuck, Conn., are erecting a parish house with twenty-four rooms, besides hall, cloak-rooms and closets. The first floor has an assembly-room, reception-room, Sunday-school, library and seven class-rooms, and on the second floor eight class-rooms, reading-rooms, kitchen, dining-room, coat and cloak rooms. On the third floor will be the pastor's study and a room for a gymnasium. —Public Opinion.

SCHOOL AND CHURCH.

—Ten counties in Iowa have women school superintendents.

—The Ms. All Mission in Paris now occupies thirty-five stations.

—If good people would but make goodness agreeable, and smile instead of frowning in their virtue, how many would they gain to the good cause? —Ussher.

—The receipts of the American Board for the first month of the present year amounted to \$30,688.57, being double that of the same month last year.

—If a man should lose an article of wearing apparel every time he told a lie, there are men who would never pray for winter. —Pomeroy's Advance Thought.

—The American Board recently held a farewell meeting in Boston for fifty-eight missionaries—one to Spain, nine to India, thirteen to Turkey, sixteen to Japan, nineteen to China. —Public Opinion.

—Prof. Thomas Carnely and a Mr. Holdam, of a college at Dundee, have been investigating sewer air, and report that it averages as pure, so far as disease germs are concerned, as the air in ordinary houses.

—The Presbyterians of New York City are talking about raising a fund of \$1,000,000 for ministerial relief, and it is desired to have the amount pledged before the centennial of Presbyterianism in 1888.

—In studying the Word of God digest it under these two heads: either as removing some obstructions that keep God and thee asunder, or as supplying some uniting power to bring God and thee together. —Cecil.

HOME NEWS.

— Leap year.
— Wanted.—More houses.
— How many times have you written 7 for 8 this year.
— Now is the time to look after lawns.
— Get your trees ready for planting.
— Schools of whales can be seen almost daily moving south.
— Great many strange faces on our streets this week.
— Carlsbad must be seen to be fully appreciated. Pen can not portray her beauties.
— Geo. Lehman went to San Diego and National City first of the week returning Thursday.
— Some very rare mosses and shells have been gathered on the beach the past week.
— Capt. D. D. Wadsworth was in San Diego this week on business for the company.
— John A. Faucher went to San Diego Thursday for a large stock of groceries.
— Faucher's Pioneer store is now lighted by a "65 candle power" lamp.
— B. A. Marshall and J. A. Gardiner of Mexia, Texas, were visiting friends in Carlsbad first of the week.
— The Mineral water bath house has a new stove and manager Kunze says the rooms will be kept comfortable at all hours hereafter.
— Miss Anna Smythe and Mrs. Rodgers of Merced have been visiting this week with the family of James Mull below town.
— Langenbach's grocery will have another consignment of that choice Columbus creamery butter in few days.
— Our friend Geo. Lehman expects to leave for home tomorrow. We wish him a safe journey and an early return.
— F. E. Knowles will soon have his cottage on 5th street ready for occupancy. It will be one of the neatest houses east of the terrace.
— Don't fail to plant shrubs, trees, vines, plants and flowers and abov all be sure to sow grass seeds and get good lawns started.
— Geo. Plumb of Emporia, Kansas, en route home from San Diego stopped over one day this week, viewing the beauties of Carlsbad.
— Plant your grape cuttings this month and you will get your first crop of grapes next September. The second year you will have grapes to sell.
— Capt. J. A. Frazier is having water pipes placed in his new house this week. Sam Roberts has charge of the work which is a guarantee of a good job.
— Col. S. C. Smith, secretary of the Carlsbad Land and Mineral Water Company has been in San Diego this week on business connected with the Company.
— Water pipes from the Mineral well are being laid to the new depot where a fountain is to be placed on the platform enabling all to quench their thirst with the celebrated water free.
— The finishing touches were placed upon the depot this week and now all is in readiness for the new agent Mr. Clark who will probably dedicate the new quarters in few days.
— J. J. Langenbach who made a business visit to Minneapolis, Minn., a few weeks ago returned last Thursday. He reports unusually cold weather in the north and great deal of snow.
— Gus. Lockner of Columbus, Nebr., was a Carlsbad visitor last Saturday. He has been in San Diego for the last few weeks and was on his way home. He expects to return in a few months and build some fine houses for rent.
— G. B. Spiece and Chas. Morse returned home to Columbus, Nebr., leaving here last Monday. They are both highly pleased with their trip to this part of the State and as an evidence of their confidence in the future greatness of Southern California purchased property and will come again.
— As an example of what can be done in the way of cultivating vegetables during the winter as well as summer we will mention the fact that L. A. Clark planted a garden late in November as an experiment. As a result he has peas in bloom, potatoes beans and lettuce doing nicely while as nice crisp redishes as one would wish to eat were served on Mrs. Clark's dinner table yesterday. December is as pleasant etc.

— The first floor on the Mammoth Hotel has been laid and the frame for the second story is up. All the men possible to work to advantage on the building are busy as bees and the work is going forward at a lively rate.
— Mr. Faucher has bought the milk business of J. Ellis to take effect Monday morning. He will have his order book with him and solicit your orders for groceries at lowest possible prices. All goods warranted.
— Mrs. Babcock and Mrs. Pratt favored the Literary Society at its meeting Thursday evening with a duett rendered in the most charming manner. Carlsbad evidently possesses musical talent second to none in the state. The society appreciates the favor and hopes the ladies may be induced to come again.
— At the regular quarterly meeting of the Carlsbad Literary Society the following officers were elected: L. A. Clark, president; Mrs. Babcock, vice-president; J. D. Morrow, secretary; Miss Lillie Richards, treasurer. Meetings every Thursday evening at the school building. All are cordially invited to attend.
— C. R. Williams of San Diego began few weeks ago ordering Carlsbad Mineral water from one to two gallons at a time. The demand has already grown to three barrels a week. At this rate of increase the Company will have to put on a regular water train before the close of the year. People will have the water regardless the expense.
— A gentleman from Pittsburg, Pa., whose name we did not learn, while waiting for the wrecked train to pull up from the bridge below town, said after looking over our city for quite a while, that in all his trip he had not seen a location so beautifully situated as Carlsbad. While he was talking a school of whales passed down in plain view and he declared that sight alone was worth coming all the way to see.
— The San Jacinto and Smith mountains donned their white robes last Sunday and now appear in full dress for the benefit of all those who are so fortunately situated as to enjoy the view. A feast for the eyes surely. What is more lovely than to stand upon the terrace amid blooming flowers and roses and view the snow capped peaks just lying off to the east like a great white cloud. It must be seen to be appreciated.
— The manner in which the present administration is conducting the postal matters in the larger cities of Southern California is a disgrace to the country. In order to get mail at the general delivery window at San Diego post office one must fall into line all the way from one to three blocks from the office and then keep there regardless of everything until his turn comes which will require a tramp of from thirty minutes to three hours. When the great power that runs things in general at Washington gets through admiring his own greatness probably he will find time to look after the necessities of the Pacific Coast. That whole cabinet would make money by taking one of their junkets to this land blessed with sunshine and sea breeze and cursed for her poor mail facilities.
— Last summer great many people came here from the interior and camped during the heated term declaring they had never before found such a delightful location. Although this is early in the year to receive inquiries with regard to accommodations for this coming summer but such are coming to hand daily some want to rent cottages, others wish to purchase and many ask concerning hotel accommodations and tent privileges. There will be hotel accommodations for all but the date when the Mammoth Hotel will be completed can not yet be announced. Houses are being built as rapidly as material can be secured, but so far as we can learn they are to be occupied by their owners. The demand for cottages is great and the supply as yet limited, but tent privileges are as free as the air and we say come to Carlsbad, bring a tent if necessary, but come.

— Eight cans of fruit for \$1.00 at the Pioneer.
— Langenbach sells all goods at Rock bottom prices. Call and see for yourself.
— Ginger snaps, cakes, jumbles and all kind of fancy crackers at the Pioneer.
— Just arrived from the East a large consignment of fine creamery butter at lowest prices at Langenbach's store.
— Fresh Kansas butter at the Pioneer. Goes like hot cakes.
— Langenbach will get your orders and deliver your goods at your house.
— "Sport" is the name of a new nickle cigar at the Pioneer. They are daisies. We know for we have tried them.

THE PHYSIOLOGICAL ACTION OF CARLSBAD WATERS.

First.—Upon entering the stomach, a decomposition of the alkaline salts takes place with development of free carbonic acid and recombination of the base with the lactic, butyric and other acids of the gastric juice. Only a small part of the new salts thus formed passes into the intestine, the rest being directly absorbed by the coats of the stomach.
Second.—The excite the secretion of the gastric juice.
Third.—If abnormal fermentation exists in the stomach, they may improve some distressing symptoms by neutralization of the acids, but they are not able to remove the cause of fermentation, on the contrary, the alkaline solution forms a fostering soil for elements of fermentation.
Fourth.—They produce peristalsis of the stomach and intestines.
Fifth.—They have the property of dissolving great amounts of mucus, which, in many cases of chronic gastritis, accumulates during the night and causes morning vomiting, by dissolving the mucus and carrying it into the intestines they purify the stomach and pave the way for a better digestion.
Sixth.—The waters of Carlsbad are to be preferred to all other mineral water where not only the neutralization of acids is required, but where also the speedy discharge of accumulated undigested food, and inordinate secretion of mucus, by the way of peristaltic motion is desirable; as, for instance, in cases of peritonitis, typhoid fever, etc.
Seventh.—Alkaline waters tend to excite the action of the liver, and in some forms of dyspepsia or rather gastritis, where only the want of appetite is the symptom present without any irregularities.
Eighth.—The purgative effect of these waters is only due to their power of promoting a strong peristalsis; by this action, the driving power of the portal vein is reinforced in a high degree, and it is enabled to remove existing hyperemia of the abdominal organs.
Ninth.—Their favorable influence upon the secretion of bile is mostly due to the great amount of water which is constantly drunk, watering places by which the bile is colored, and its passage into the duodenum much facilitated.
Tenth.—As to the earlier discharge of gallstones during the use of alkaline waters, a fact that is placed beyond doubt by experience, it is not due to the action of the water, but to the property of alkalies to keep the cholericine in solution, or to the stronger contractions of the gallbladder.
Eleventh.—A great influence upon the alkalinity of the blood has been attributed for a long time to the use of alkaline water and in connection with it to a more perfect oxidation, and a diminishing of acids in the blood. According, however, to the inquiries of Buchheim, the excess of acids in the blood is quickly eliminated by the urine, and we must seek for another use to explain the almost wonderful effects of it in all cases of obesity. Such an effect of proper diet and the frequent evacuations, preventing the total absorption of the excess of acids in the blood, and the blood, have a great share in this effect.
Twelfth.—The efficiency of Carlsbad Waters in dissolving mucus has been well established by Hirschman, Kruis and others. The percentage of sugar is reduced to a minimum and the general health of the patient improves and the waters are now the recognized remedy for this malady.
Thirteenth.—All the authors agree in the favorable effects of Carlsbad water in uric acid diseases, produced by excess of uric acid and phosphate of sodium in the urine, their irritating action upon the mucous membrane of the pelvis of the kidneys, ureters and bladder being abated by the alkaline action of the urine. Likewise the formation of uric acid crystals in the kidneys may be prevented, or if present, rendered smaller and more easily expelled by irrigation, a fact that is frequently observed in the treatment of patients thus suffering.
Fourteenth.—The Carlsbad Waters are not diuretic. The quantity of urine passed under their influence is less than that of the alkaline waters.
Fifteenth.—The morning urine passed immediately after taking the water has an alkaline reaction; that passed later has a neutral or acid reaction.
Sixteenth.—The uric acid is diminished.
Seventeenth.—The excretion of uric acid diminishes in most cases.
Eighteenth.—The alkaline phosphates are more freely eliminated during the use of these waters.—Cincinnati Largest Clinic.

A. E. BANRY,

Painting and Kalsomining,
Decoration and Paper Hanging.
All work done with neatness and dispatch.

HARRY L. TITUS,

ATTORNEY AT LAW.
SAN DIEGO, CALIFORNIA.

N. Faucher's Pioneer Store,

Carlsbad, California.
A full line of
Staple and Fancy Groceries,

From two hundred to five hundred dollars per year will you award to your own self by trading constantly at
The great IXL at Oceanside.
Why?
We give it to you here in a nut shell:
We buy direct for cash thereby making on discounts on an average Seven per cent. Our buyer member of this firm resides constantly in San Francisco, watching the terms of trade, thereby saving Twenty-five per cent. All our flower, potatoes, groceries arrived in Carlsbad—lots—which means half the freight, smaller lots have to pay Five per cent. Grand total, all our goods cost us Thirty-seven per cent. Less than any other firm in this vicinity can reach it. Remember we have no special rates, days, but we guarantee you every day in the year that we can and will sell you thirty-seven per cent cheaper than you can buy in San Diego or elsewhere. Remember we have the largest stock and finest assortment in San Diego county. All kinds of country produce taken in exchange for goods.
Yours respectfully
D. Jacobs & Co.
